

# About ENVIRON

A leading technical and scientific consulting firm, ENVIRON provides state-of-the-art scientific, engineering, and strategic risk management assistance to an international client base that includes leading law firms, national and transnational industrial and commercial concerns, trade associations, lending institutions, insurance professionals, and public-sector agencies.

Clients rely on us to address a wide variety of human health and environmental issues related to the presence of chemicals in the environment; in foods, drugs, medical devices, and consumer products; and in the workplace; as well as business issues related to the development and use of energy and environmental technologies. Practicing from a global network of offices in the Americas, Europe, Asia, and Australia, our professional staff represents a wide variety of engineering, scientific, public health, and regulatory affairs disciplines.

By striving to:

- understand our clients' organizational structure and needs,
- provide our clients with ready access to senior-level professionals,
- engage or develop the most sophisticated tools of our trade, and
- deliver effective, useful reports

we are able to help clients achieve efficient, cost-effective solutions to their problems.
